Dear Student Teacher, Cooperating Teacher, and University Consultant:

This document serves as a reference guide for student teachers, cooperating teachers, and university consultants involved in observing and assessing the performance of EMU student teachers. It should be used when completing the Formative Observation of Student Teaching form and the Assessment of Student Teaching form (both mid-block and final). It has been carefully coordinated and cross-referenced with the six program outcomes delineated in Eastern Mennonite University's conceptual framework. A summary of the framework is contained in the *Student Teaching Handbook*, and a copy of the cross-reference matrix is available upon request. The assessment and reference guide has also been developed using research-based guidelines by subject experts. It incorporates all 10 InTASC standards and all seven Virginia Teaching Performance Standards, as well as subject-specific standards and guidelines, and encourages a performance-based process for supporting the professional growth of pre-service teachers *over time*.

When using this reference guide for *observing* student teachers, the guidelines should typically be interpreted in terms of *discrete* instructional activities (the single lesson, project, or other activity being observed). Depending upon the activity being observed, it may not be appropriate to address all competencies on the observation form each time. Feedback should focus on narrative comments and suggestions to encourage reflection and assist the student teacher in his/her journey toward professional competence as a beginning teacher. *The anchors for each competency should be used only to help focus the nature of this feedback; student teaching performance should not be "rated" during an observation.*

When this reference guide is used for mid-block and final *performance assessment*, the guidelines should be interpreted more broadly in terms of instructional activities *over time*. Although narrative comments should still focus on providing feedback for continuing professional growth as a pre-service teacher, *anchors should also be used at this time to assign a rating for all competencies*. If a student teacher's performance cannot be fully described by an anchor level's indicator, then you should not choose that level. Narrative comments should always accompany any rating when needed to explain the rationale for the rating.

Please Note: The top score is Exceeds Expectations (EE) and is an appropriate rating for a competent in-service teacher. In unusual situations, a highly competent student might earn this rating. By drawing the continuum of behaviors into the realm of excellence, it allows candidates to see that their professional skills will and should continue to evolve as they journey into their careers.

This evaluation cannot be shared with anyone outside of the university without the written consent of the student teacher.

We hope that this process for assessing the performance of student teachers will be helpful to all participants – student teachers, cooperating teachers, and university consultants alike. As always, we welcome your comments and suggestions for further improving the preparation of Eastern Mennonite University's teachers.

Sincerely,
Ron Shultz, Coordinator of Field Placement
EMU Education Department
